

# Filler Flowers

by Susan Abdella MDA

Tips on painting filler flowers.

Treat filler flowers the same as other objects in the design using the same light source.

Filler flowers in the focal area will have a stronger light source, more intensity and values.

Values, temperature, intensity, and color all become closer in relationship to the background as they recede.

Use filler flowers to move color through tints and accents.

Visit nurseries to gather photos of filler flowers so you will have a variety to choose from.
